

899-0020

WinGPC Compliance Pack

Venue:
online

This software training course is designed for WinGPC Compliance Pack administrators, IT professionals responsible for CSV (computer system validation), and users responsible for validation.

Date 2023:
29.09.2023

It discusses the special features and special options for WinGPC with Compliance Pack for compliance with GAMP5, GxP, ISO DIN EN and FDA 21CFR11.

Participation fee:

€725,-

The participants practice the setup of users, the allocation of group rights and the analysis of logbooks in small working. They will use the PSS tools to validate and verify the WinGPC software and data collection hardware in practical examples and demonstrate the correct installation and operation for third parties.

Price excl. VAT
@19%

Covered topics:

- WinGPC and Compliance Pack philosophy
 - WinGPC administration tool
 - User administration and userlevels
 - Logbooks and logbook administration
 - Trouble shooting
- ✓ After successful participation each attendee should be able to administrate the WinGPC UniChrom Compliance Pack, to identify and apply settings reflecting the company policy, to control audit trails, to set user level rights and to perform meaningful IQ/OQ for GPC/SEC systems.

PSS In-House Trainings

On-site training by an experienced polymer chemist with many years of experience in the characterization of macromolecules and very good knowledge in the PSS WinGPC software.

The training content is determined in consultation with the participants and depends on your questions in the laboratory and the participant background.

Venue:

Upon agreement

Date:

Upon agreement

Course fees and part numbers:

1-4 Attendees

1 Day: (899-0005)

2 Days: (899-0006)

3 Days: (899-0045)

5-9 Attendees

1 Tag: (899-0014)

2 Tage: (899-0044)

3 Tage: (899-0046)

Prices on request

Possible areas and topics:

- Theoretical background and fundamentals of the GPC / SEC
- Interaction chromatography of polymers
- Column selection
- Method development
- Calibration and calibration options
- 2D chromatography
- Viscometry
- Light scattering
- Advanced detection methods
- High temperature GPC
- Operation of WinGPC and its modules
- Discussion of evaluation options
- Discussion of specific questions
- Accuracy and reproducibility
- (Bio) SECcurity Operation and maintenance
- Validation / Qualification
- ... and all other aspects from the PSS training courses

You are ready to submit:

- ✓ Seminar room and/or computer workplace
- ✓ Representative samples or data
- ✓ Ready-to-use GPC system (if a practical part is requested)
